COMPANY PROFILE

www.mecssolutions.com

ABOUT THE COMPANY

MECS simply means "Mobility, Enterprise, Cloud and Security". We strive to help companies shift to a modern strategy through digitalization.

2019

MECS Software Solutions Incorporated ("**MECS Software**") was founded in 2019.

The primary purpose of the Company is to offer a complete software and hardware solutions depending on our client's business needs.

2021

Despite the covid19 crisis, MECS continued to grow and formed MECS Industrial Technology Solutions Incorporated ("**MECS Industrial**") in 2021.

OUR CORE VALUES

01

Integrity

We uphold integrity and lead as example to everyone.

02

Accountability

We deliver our promises with no excuse.

03

Respect

We value our people and treat everyone with respect.

04

Client Relationship

We build a long term relationship with our clients and deliver the highest standard of our services

05

Teamwork

We live, work, and achieve our goals together.

06

Workplace

We find ways to enjoy every task and provide a work-life balance.

07

Sucess

We dream, we plan and make it happen!

OUR SOLUTIONS

Software Solutions

Network and IT Solutions

Security Solutions

Fire Safety Protection

Electrical Systems

Concrete Plant Solutions

Structured Cabling Solutions

Software Solutions

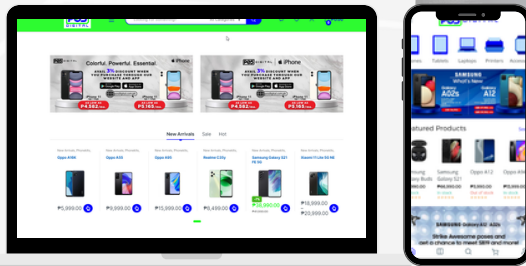

We build customized software based on our clients' needs and we offer solutions to the difficulties that they face at management and operations level.

We also offer readily available software solutions for different domains like Accounting and Human Resources.

Software Development

MECS specialises in Research and Development. We've built different software solutions for different purposes. Here are a few of them, and we are not limited to these. Challenges are meant to be challenging.

- Time and Attendance
- GPS Fleet Management System
- Learning Management System
- Hospital Management System
- Ticketing and Billing System
- Weighing Softwares

Website and E-commerce Development

We develop websites or web apps based on client requirements. It could be a simple or complex corporate landing page. We also maintain websites, from server hosting to domain setup and deployment. E-commerce is one of the many.

Point of Sales

Web based POS

Restaurant POS

Standalone General POS

Mobile Application Development

To maintain growth, businesses must adapt to current trends. We develop everything from e-commerce mobile applications to multi-service applications.

Accounting/ERP

SAP Business One

QuickBooks

ABSS Accounting Software

POINT OF SALES

- Web based POS
- Standalone POS
- Restaurant POS

Web based POS

This point of sales system is designed to have a central database where management can easily see all transactions and inventories within all the branches. You can easily see the movement of goods and supply levels with one click away.

- Sales
- Purchasing
- Stocks
- Stock Transfers
- Receivables and Payables
- Profit and Loss
- and many more ...

Server Hosting

On-Premise

The Server and Database will be inside your company. Network infrastructure must be good.

Cloud

The server and database will be in the cloud, hosted on Amazon or other secure datacenters around the world.

Standalone POS

Simple to advanced POS that can be installed on a computer. There is no need for servers, the internet, or a network. Just install and run the application.

Restaurant POS

This POS is for medium-to-large restaurants that cater to per-table orders and kitchen monitoring. This system is so advanced that we can also do integration for tablet ordering and queue monitoring. A strong feature for this system is the inventory monitoring up to the smallest ingredient in the recipe.

- Table order monitoring
- Kitchen monitoring
- Tablet ordering
- Queue monitoring
- and many advanced features.

General POS

Whether your business is small or medium-sized, you must have proper sales, purchase, and inventory monitoring of your products. This system was designed for that purpose.

Simple but fast transaction recording with very flexible reports. This system is so user-friendly that it can be operated with a touch-screen monitor, is keyboard-friendly and has an interface for barcode scanning.

- Sales
- Purchasing
- Stock Movement
- Multi Shift Recording
- Near Expiry Monitoring
- Flexible Discounts
- Data Rich Reporting
- Account Receivables & Payables
- Barcode Scanning
- Multi Branch Ready
- Display Pole Ready

Ideal for the following

Pharmacies

Groceries

Hardware Stores

Petrol Stations

Coffee Shops

Bakeries

Restaurants

- Check your business health
- Send invoices & manage debtors

Network & IT Solutions

Manage ALL your IT Infrastructure Operations and get the business edge you've always wanted. MECS provides technology solutions to help enterprises accelerate in the new digital economy.

Wireless network

With completely scalable and customized solutions, we provide a comprehensive range of wireless product solutions for indoor, outdoor, enterprise, and residential Wi-Fi network equipment.

Routers, Switches

Planning your network to help your organization grow is now more important than ever. Our world is now facing the impact of disruptions and inefficiency.

We can provide a solution for you to respond to business needs faster and increase productivity while maintaining security and policy across thousands of sites.

Network Firewalls

Network traffic visibility is desperately needed in a world where new threats are emerging daily.

Superior protection, detection, and response that prevents more threats faster will keep your data safe wherever it is. Invest now in cybersecurity, where your confidential data is all safe!

Uninterrupted Power Supply

MECS provides a wide range of backup power UPS and distribution equipment. We want to help you maintain business continuity and avoid downtime.

We can deliver high-quality, reliable backup power from network closets and server rooms to enterprises and data centers.

Servers, Workstations, Laptop, Desktops

Boost your productivity in your workplace with higher performance and more reliable equipment for the faster growth of your business.

Structured Cabling Solutions

Your structured cabling topology is a critical component of your infrastructure. MECS offers a solution that will deliver the level of performance needed to increase uptime, optimize scalability, and maximize return on investment while minimizing operating expenses.

We can design and deploy cabling systems for all your voice, data, and other wiring infrastructures to implement a cost-effective network that can meet a business's current needs.

PBX Systems

Designed to enhance both internal and external business communication experiences and to improve your daily operations

Fire Safety Protection

Fire Safety Protection reduces the losses associated with an unwanted fire in any building. And this includes properties and, more importantly, human life. This provides early notification to building occupants so they can exit the building, and notifies the fire service so they can respond to fire.

Invest now in our fire systems for the protection of life and property!

Electrical Systems

Electricity powers almost everything that makes our lives comfortable. Get ready to harness the power of these disruptive technologies to improve operations and increase business value!

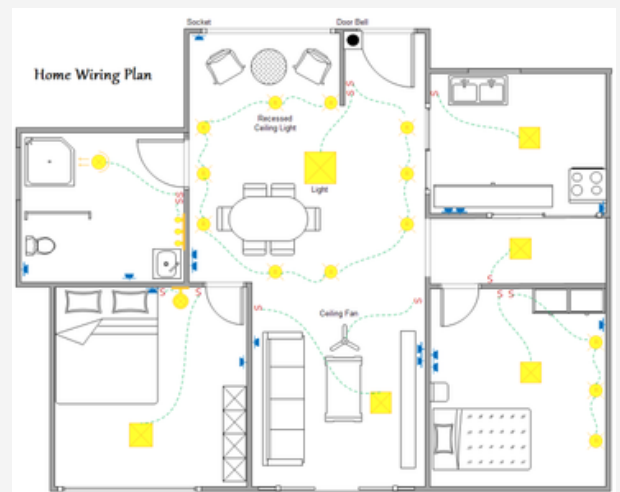

Generators

Generators can be utilized to keep your business powered and are designed to power electronics and appliances. With reliable, portable and heavy-duty generators, you can make sure that you are ready for any power outages that may occur.

Residential

Electricity is integral to our way of life. We understand that every business needs a reliable electrical wiring system to provide the exact amount of power for any type of store building, offices, or residential without overloading.

We do free site surveys to better serve our clients. We have a team that can do house wiring installations and repairs.

Solar Power Systems

Solar power can help you reduce your electricity bill, raise the value of your home, and reduce your carbon footprint. Our hybrid and off-grid solutions help areas where a functional grid is not available, and they can help overcome frequent power interruptions.

We can provide you with planning and installation services for any home or business!

Concrete Plant Solutions

Having a reliable system for a 24-hour industrial operation will take out all your worries about downtime and efficiency. Our batching software and control system have been battle tested on over 180 batching plants all over ASEAN, with almost all using data integration.

Leading ready-mix companies in ASEAN use Auto Dispatch and Remote Batching Systems to orchestrate their multiple batching plants.

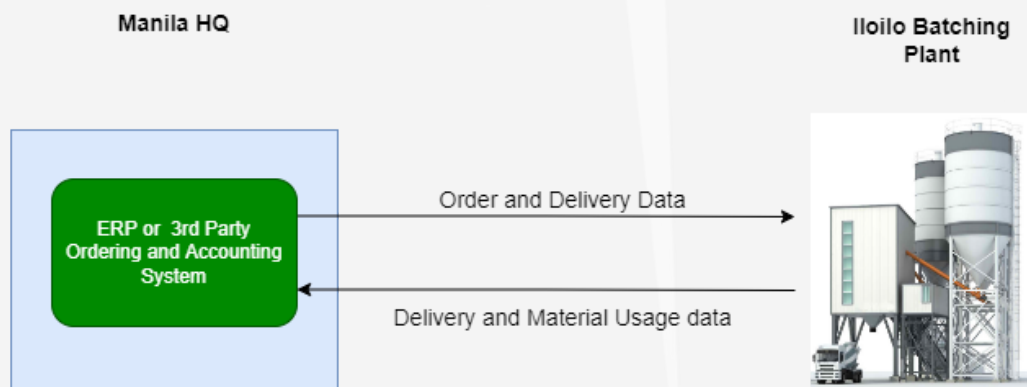

Batching Plant Software and Control Systems

For over 10 years of development and iteration based on industry best practices. Our system offers a variety of features that can guarantee an easy transition and stable operation. Our system includes ordering, delivery, and mixing designs as standard features. Production reports and many more are available.

ERP Integration

Time and data are gold. We adhere to that. That is why we also offer data integration from your existing ordering systems or full-scale ERP systems to our batching software. You give us what to process, we give you back the usage. For that, we can shorten the time for delivering the product and also reduce the time that accounting can crunch that data into your system.

Support unlimited nos. of batching plants.

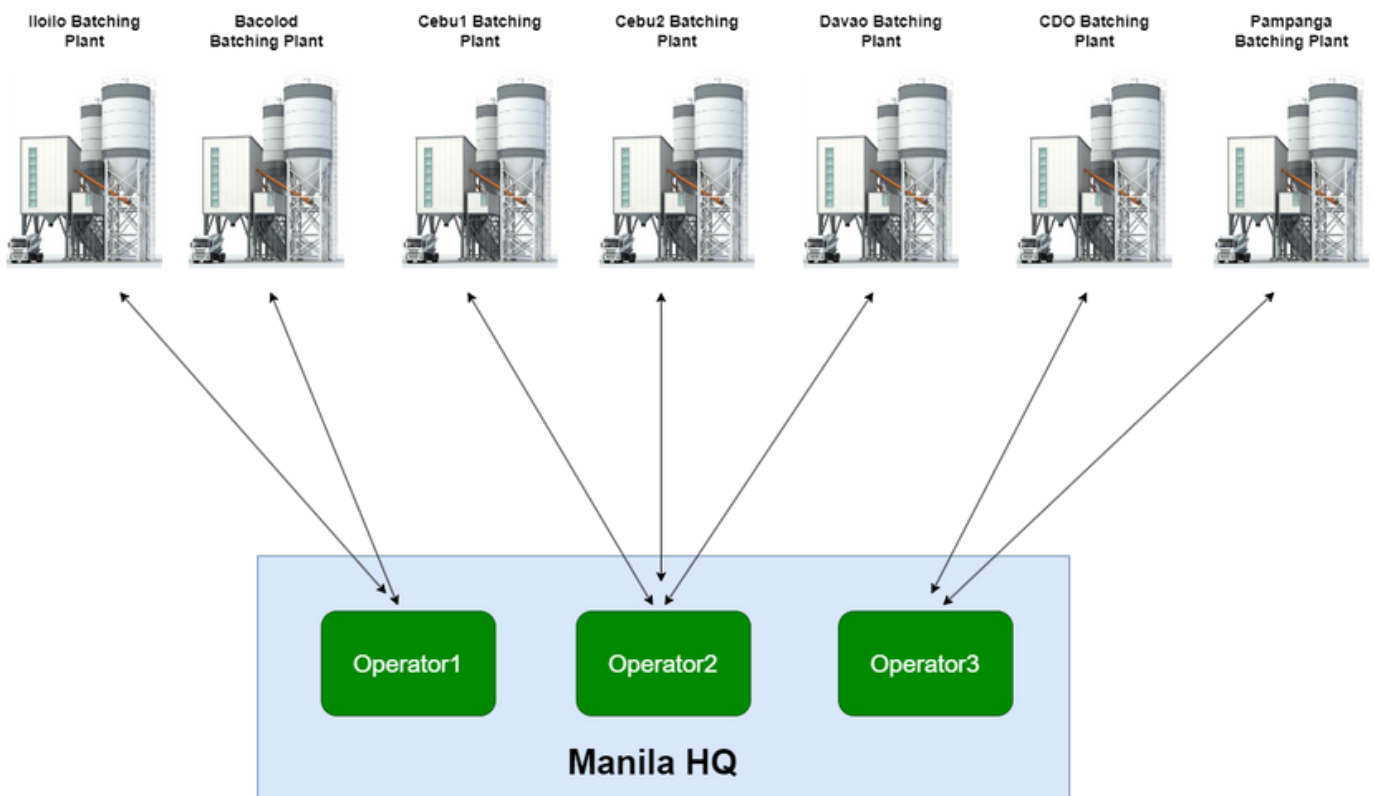

Auto Dispatch System

Growing companies with 5 to 100+ batching plants is a pain to maintain and orchestrate. Let our system help you orchestrate the daily operations. With AI technology and machine learning, we can make use of GPS, plant efficiency, truck availability, and other datasets to properly schedule and deliver products to your customers. It means fewer headaches and more efficiency when it comes to plant operation, manpower, and truck efficiency. Let the system auto-schedule it for you. Of course, overrides are available.

Remote Batching Plant System

The Internet will be here and it is still evolving. With the Philippines as an archipelago, operating batching plants nationwide is very hard. You need to hire local experts to maintain and operate it.

Why not control or operate your batching plant nationwide from your company HQ? Less manpower, less cost. A batching plant operator can operate two or three batching plants simultaneously. Make use of the internet and see what benefits you can get when harnessing it.
